PROFESSIONAL SUMMARY

BS Software Engineering graduate with hands-on experience in AI, machine learning, NLP, and automation. Fine-tuned OpenAI Whisper (0.8B parameters) for Urdu ASR and published 9 model checkpoints on Hugging Face. Built full-stack AI web apps with Streamlit and Flask, designed REST APIs with FastAPI, and delivered BI solutions across multiple industry internships. Proficient in Python, Java, and the modern AI/ML ecosystem.

EXPERIENCE

Lead Generation Specialist

Nov 2024 – Jan 2025

Silverlight Research (Remote)

- Generated high-quality B2B leads via LinkedIn targeting decision-makers and senior industry professionals.
- Leveraged Apollo.io and Exa to identify, verify, and extract accurate contact and company data.
- Built structured lead lists supporting outreach campaigns, improved quality through targeted filtering.
- Tracked and maintained lead database accuracy, ensuring consistent and up-to-date records for the sales team.

Multi-Sector Intern

Jul – Aug 2024

NADRA Headquarters, Islamabad

- Supported identity verification and data management workflows under strict security and privacy compliance.
- Worked with enterprise-scale databases; gained practical exposure to data validation and information systems.
- Assisted in automating data processing tasks, enhancing operational throughput and accuracy.
- Collaborated with cross-functional teams to document workflows and improve internal data handling procedures.

Python Developer Intern

Jul – Jul 2024

CodexCue (Remote)

- Developed Python automation scripts to eliminate repetitive tasks and improve workflow efficiency.
- Debugged and optimised existing codebase, improving application performance and reliability.
- Documented code changes and contributed to internal knowledge base for the development team.

Business Intelligence Intern

Jul – Aug 2023

PTCL Headquarters, Islamabad

- Managed and queried relational databases in MySQL to support data analysis and reporting.
- Designed interactive Power BI dashboards translating raw data into actionable business insights.
- Created Entity-Relationship Diagrams (ERDs) for data modelling and system documentation.
- Presented data findings to senior staff, supporting data-driven decision-making across departments.

Network Operations Intern

Jul – Aug 2022

PTCL CDDT, Islamabad

- Gained practical knowledge of telecom network infrastructure, monitoring, and operational workflows.
- Developed Python scripts for data handling and automation tasks across network operations.
- Generated network performance reports using Power BI; assisted in identifying performance bottlenecks.
- Built foundational understanding of enterprise networking concepts and large-scale system operations.

PROJECTS

Video Analysis System — Final Year Project

[HuggingFace ↗](#)

Python · OpenAI Whisper · BART · NLP · Streamlit

- Full-stack web app for end-to-end video transcription, summarisation, and content management.
- Fine-tuned Whisper (0.8B) on custom Urdu datasets; published 9 model checkpoints on Hugging Face.
- NLP summarisation with BART; subtitle keyword search with segment editing and deletion.

Flask Anime Screenshot Filtering

[GitHub ↗](#)

Python · Flask · Computer Vision · OpenCV · Image Classification

- Flask web app filtering and classifying anime screenshots using OpenCV computer vision pipelines.
- Automated scene detection and content filtering; clean upload interface for dynamic querying.

REST API Development with FastAPI

[GitHub ↗](#)

Python · FastAPI · REST · Pydantic

- Production-style REST endpoints with Pydantic validation and auto-generated Swagger docs.
- CRUD operations with proper status codes, error handling, and request/response schemas.

End-to-End Data Analysis Pipeline

[GitHub ↗](#)

Python · SQL · Pandas · NumPy · Matplotlib · ETL

- ETL pipeline integrating Python with MySQL for data ingestion, cleaning, and structured querying.
- Advanced SQL (Joins, Subqueries, Window Functions) and KPI visualisation with Matplotlib.

Management Systems Suite

C++ · Java · SQL · OOP · Data Structures

- Hospital & Hostel Management Systems in C++ with file handling, linked lists, and arrays.
- Library & Patient Management Systems in Java + MySQL applying OOP and relational DB design.

2D Racing Game & Internet Speed Test Tool

Lua · Python · OOP · Networking

- 2D racing game in Lua with full game loop, player controls, and OOP-based class architecture.
- Python networking tool for real-time download/upload speed measurement with automated reporting.

TECHNICAL SKILLS

Languages:	Python, SQL, Java, C++, JavaScript, HTML/CSS
AI / ML:	Fine-Tuning, Model Training, NLP, Scikit-learn
Frameworks:	Streamlit, Flask, FastAPI, N8N, Daft/Flutter, Figma
AI Libraries:	Hugging Face Transformers, OpenAI Whisper, BART, NumPy, Pandas, Matplotlib
Databases & BI:	MySQL, PostgreSQL, XAMPP, Microsoft Power BI, MS Office
Platforms:	Kaggle, Google Colab, Hugging Face Hub, GitHub

EDUCATION

Bachelor of Science in Software Engineering

Oct 2021 – Jun 2025

Pak-Austria Fachhochschule: Institute of Applied Sciences and Technology (PAF-IAST), Haripur
